

Recombinant Influenza Hemagglutinin (H5N1) (A/Vietnam/1203/2004)

Catalog #: 1501-001

Lot #: 1710003

Description: Recombinant, Influenza Hemagglutinin Full-Length Glycoprotein from virus strain A/Vietnam/1203/2004 (H5N1). Recombinant HA (rHA) is supplied as an affinity purified protein. rHA is produced in Sf9 insect cells using baculovirus for expression and is purified by FPLC.

Storage: 2-3 weeks at -20°C, -80°C long term

Size: 50 µg of protein is supplied at a concentration of 0.665 mg/mL (by BCA) in Tris buffered saline and 0.01% non-ionic surfactant. The theoretical molecular weight of the protein is ~64 kDa, without glycosylation. Because of the highly glycosylated nature of this protein, migration in an SDS-PAGE gel is slowed resulting in broad, diffuse bands representing differing glycosylation forms.

Relevance: Recombinant hemagglutinin glycoprotein provides a control protein for immunoassays and a tool to enhance Orthomyxovirus research.

SDS-PAGE

SDS-PAGE and stain demonstrating 5 µg and 1 µg (lanes 1 and 2, respectively) of rHA protein under denaturing and reducing conditions.

Hemagglutination using Turkey Red Blood Cells:
 HA titer 1:8192

rHA Lot 1710003
